

Hello!

We're excited to have you at one of our events, and that you're willing to record a short video of yourself to help us promote it. We've created this document to help you record the best video so that we can highlight you to the best of our ability.

How Should I record?

1. If you have some form of tripod or ring light, those will be helpful while recording.

2. Record vertically. These promos will go on social media, so this will help us while editing.

3. Record in a quiet, controlled environment. Avoid dim or overly lit areas.

4. Have energy, look excited, and be yourself! Tell us why you're excited for this event.

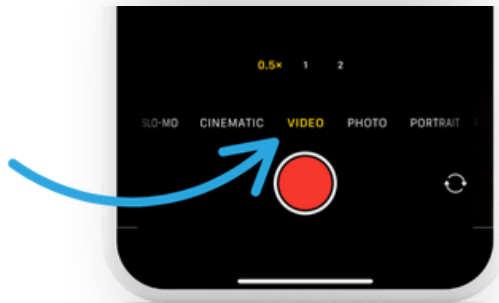

Submit Your Promo Here:

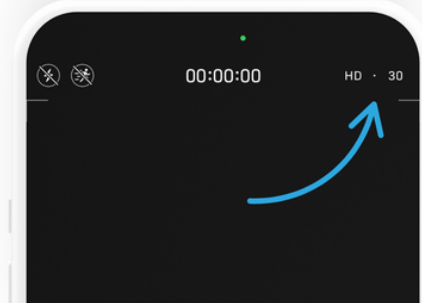

Usually, a dropbox submission link would go here!

iPhone Setup

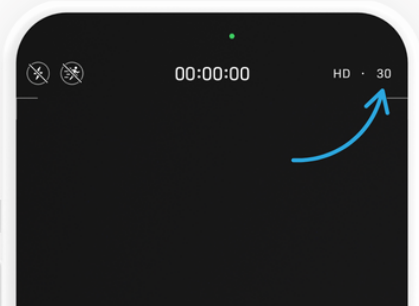

1. Open your camera app and go to video mode.

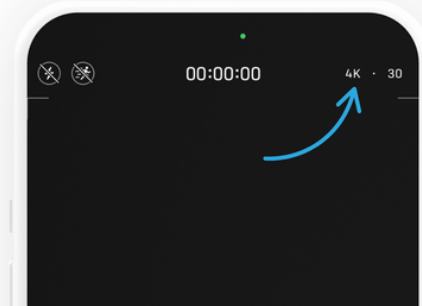

2. Locate the Resolution and Frame Rate options in the top-right corner

3. Set your Frame Rate to 30.

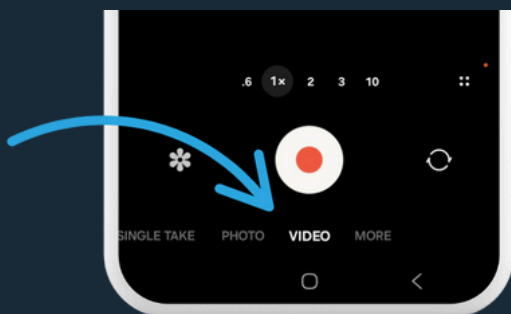

4. Set your Resolution to 4k . (HD is okay, but 4k is preferred.)

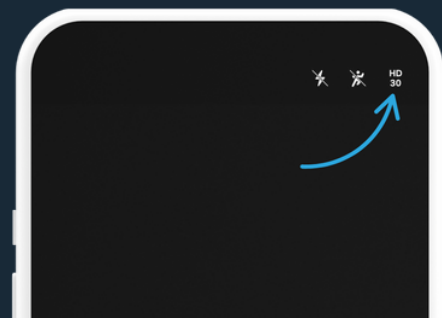

Android Setup

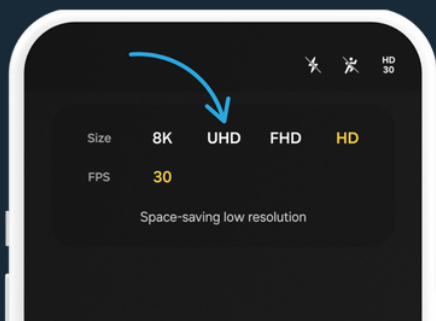

1. Open your camera app and go to video mode.

2. Locate the Resolution and Frame Rate options in the top-right corner.

3. Set your Resolution to UHD. (FHD is okay, but UHD is preferred.)

4. Ensure your Frame Rate is set to 30. (It may bet set to 30 by default.)
